

Camarilla Pivot Points V2

HPotter 100% May 8, 2020

Camarilla pivot point formula is the refined form of existing classic pivot point formula. The Camarilla method was developed by Nick Stott who was a very successful bond trader. What makes it better is the use of Fibonacci numbers in calculation of levels.

Camarilla equations are used to calculate intraday support and resistance levels using the previous days volatility spread. Camarilla equations take previous day's high, low and close as input and generates 8 levels of intraday support and resistance based on pivot points. There are 4 levels above pivot point and 4 levels below pivot points. The most important levels are L3 L4 and H3 H4. H3 and L3 are the levels to go against the trend with stop loss around H4 or L4. While L4 and H4 are considered as breakout levels when these levels are breached its time to trade with the trend.

Is there a way to stop the repainting when using the pivots in the 1 minute time frame?

Cevap Gönder

S **smit1999** · Oca 22 ·

hello sir , i want one change in this code if you please please help me , i want find daily camarilla level base on previous 2 days data not only previous day data , if i want this then what i change in this code???

Cevap Gönder

RedfishUK **PRO** · Haz 21, 2021 ·

There seems to be an issue when using the Daily Pivots on lower timeframes, when the Pivot point re-calculates at each candle, it uses the current Daily Prices and moves slightly. When you refresh the screen it works OK.

This seems to be solved by using the Previous Day's data and the barmerge function eg

xHigh = security(syminfo.tickerid,res, high, barmerge.gaps_off, barmerge.lookahead_on)

xLow = security(syminfo.tickerid,res, low, barmerge.gaps_off, barmerge.lookahead_on)

xClose = security(syminfo.tickerid,res, close, barmerge.gaps_off, barmerge.lookahead_on)

A **AzuraTrades** **PRO** · Ara 4, 2020 ·

Hi HPotter, would you know how to project the pivot lines into the next period before it opens?

Cevap Gönder

HPotter **WIZARD** · Ara 7, 2020 ·

@AzuraTrades, I do not know. Sorry.

Cevap Gönder

ICEKI **PREMIUM** · May 8, 2020 ·

Very detail explanation; Thank You HPotter <3
