

Chandelier Exit  
everget WIZARD Mar 7, 2019

Mar 7, 2019 This is a redesign of the [Chandelier Exit](#) Indicator. It removes stupid transitions between Chandelier Exit' states and highlights initial points for both lines.

This indicator was originally developed by Charles Le Beau and popularized by [Dr . Alexander Elder](#) in his book "[Come Into My Trading Room: A Complete Guide to Trading](#)" (2002).

In short, this is a trailing stop-loss based on the [Average True Range \(ATR\)](#).

Ağu 4, 2019 **Sürüm Notları:**

- Added Buy/Sell alerts
- Added Buy/Sell labels

Ağu 4, 2019 **Sürüm Notları:**

- Fix erratum

Ağu 26, 2019 **Sürüm Notları:**

- Updated to v4

Eki 13, 2019 **Sürüm Notları:**

- Added long/short state highlighting

Kas 27, 2020 **Sürüm Notları:**

- Update

Good evening, what are the best settings for using chandelier with cryptos? 22 or 30/31? Thank you

+22 ▲ [Cevap Gönder](#)

 alskdj Premium · Oca 17, 2020 [Cevap Gönder](#)

What happened here?

+22 ▲ [Cevap Gönder](#)

 everget WIZARD · Oca 17, 2020 [Cevap Gönder](#)

@alskdj, longStop = highest(high) - atr

+15 ▲ [Cevap Gönder](#)

 alskdj Premium · Oca 17, 2020 [Cevap Gönder](#)

@everget, "longStop = highest(high) - atr" wont do the trick - Cannot call 'highest' with arguments (series); available overloads: ...

longStop = highest(high, lenght) - atr

gives the same result because it asks for the same data.

Hello  
Thank you so much for your Chandelier Exit Indicator.  
I'm using it and results is good in 15 Minute (Scalp trades). In 25 trades give 200% profit and 92% winrate, only 2 trades closed with loss.  
I'm using a bot for own trades.  
After receiving an alert only I can sending close price and must trailing own trades  
Can I send Targets and StopLoss to bot?  
Thank you so much!

@KaspB2206, sure

+2 ▲ Cevap Gonder

a alskdj PREMIUM · Oca 16, 2020

This script has a little problem that makes it impossible to use for stop loss order placement.

Lets hope this makes sense :) :

It wont close the position when long exit (SL price) is hit. It waits one more additional bar and then its close at the end IF, this new bar close is below the SL level.

So, if its a 30 min bar, we are at bar #1 - price drops down below stop loss price line (SL should be executed and is if you used this price)  
Script flashes the Sell signal, price moves up, signal is gone (completely acceptable behaviour for some type of indicator scripts but not for stop orders)

Then, bar #1 closes above the SL level.

Next bar, bar #2, opens and drops below the SL price. Sell signal is flashed again, and ONLY if bar #2 closes below SL, Sell signal becomes permanent.

Now, to use that, I have to use "on bar close" for my alert and in this example, its close to 1 h later the SL price was crossed. Smells like serious disaster. :)

There is no option available to make it behave like real world SL would.

So, if you use the SL levels as indicators for SL orders, you will end up being stopped out and the script continues as it was still long. So, it goes out of sync with the real world.

+4 ▲ Cevap Gonder

e everget WIZARD · Oca 17, 2020

@alskdj, Hi, thank you for the feedback. I will figure out and fix that issue when I have a free time

+1 ▲ Cevap Gonder

s sikander28 PRO · Eyl 17, 2020

@everget, @alskdj If you uncheck the "Use close Price for Extremums ?" box within the indicator settings, you will see the results you are expecting. @everget has done an excellent job coding the Chandelier Exit Indicator which was originally developed by Charles Le Beau and popularized by Dr . Alexander Elder in his book "Come Into My Trading Room: A Complete Guide to Trading" (2002).

S sal157011 · Mar 7, 2019

Something wrong on 13 Aug 2018 ? Shouldn't the green line be always going up or sideways?

+3 ▲ Cevap Gonder

e everget WIZARD · Mar 7, 2019

@sal157011, Yes, I also noticed. Will check tomorrow. Thanks!

▲ Cevap Gonder

S sal157011 · Mar 9, 2019

@everget, I think I have found one solution for our problem. The problem is that when the atr is too large and is added to the chandelier high or low it engulfs the close, so we should use the chandelier based on the close. Try to change the 10 an 11 lines of the script with  
long = highest(close,length) - atr  
short = lowest(close,length) + atr

+6 ▲ Cevap Gonder

e everget WIZARD · Mar 9, 2019

@sal157011, thanks a lot! I am working on update also. Trying to keep the original formula

+1 ▲ Cevap Gonder

L LucF PREMIUM · May 4, 2019

@sal157011, Chandelier can by design go down/up if ATR increases or no new hi/lo is made.

 **Z** **Zack\_Wallcroft** · Kas 16, 2021 [Cevap](#) [Favorilendir](#)

Hello, thanks for this awesome indicator, I found a way to profitably use it in 3commas in mix with another indicator, in theory it could filter the sideways movement while catching the peaks and dips on the 1min chart, getting around 0.5%-2% consistently every day on a stable crypto pair like BTC/USDC, however it gives too many signals and the bot gets errors and shuts down. Basically I need the chandelier exit indicator to send an alert once per trend instead of several (one alert during uptrend, followed by one alert on downtrend).

I use the supertrend indicator with the 3 min data but on the one minute chart

Basically in order to work properly the following conditions are needed:

\*BUY signal

-Supertrend indicator is in uptrend on the 3 min data

-chandelier exit gives "buy" signal

-Only one signal per trend, the first one, ignoring the rest of the chandelier exit signals until the trend changes

\*Buy close signal

-supertrend changes to downtrend

\*SELL signal

-Supertrend indicator is in downtrend on the 3 min data

-chandelier exit gives "sell" signal

-Only one signal per trend, the first one, ignoring the rest of the chandelier exit signals until the trend changes

\*Sell close signal

-supertrend changes to uptrend

Is it possible for you to make a new indicator out of those two with those specs?

I need some clarification on this. I've seen people create videos for this using the "exit arrows" as entry points, but other videos saying they are called exit arrows for a reason and not meant to be a sign to enter a trade. Are they just meant to be signs for exiting a trade and used in conjunction with indicators that provide buy/sell signs or can they be used as entry signs, too?

Which timeframe this Indicator works best?

▲ Cevap Gönder

spoorthitradings PRO · Mar 13 ▲ ▪

Hi, I am trying to figure out my entry point rather than exit with this Chandelier exit indicator.

Longstop will be my short entry and Shortstop will be my long entry.

A couple of questions here:

Period 22 is used as the default value for the lengths and ATR. I find a perfect perfect entry when my settings are periods 1 and 1.85 as multipliers.

My question is when I do the math for the same I don't get the buy signal as shown on the chart with my 1 and 1.85 settings.

Regardless of changing the settings the math and signals should match both by hand and charting correct?

Eagerly waiting for the creator to have a look and help me with suggestions.

hello! I've recently be using your chandelier exit Indicator, with the buy and sell signals. I've been really confused, though: when I hover over a buy signal, on the top left corner, I see a green number value of the price I should've bought at, but when I look at the stock/crypto @ that exact time, it never reached that low to buy in the first place. are you able to maybe clarify what I am clearly misunderstanding? or is there maybe an issue?  
thanks a lot!

A **amirmd99** · Ara 19, 2021 [Cevap Gönder](#)

does it repaint ?? seems very accurate and it's not natural :)

[Cevap Gönder](#)

 **zackfair\_eth PRO+** · Mar 20 [Cevap Gönder](#)

@amirmd99, i don't think so. If you code it into strategy, win rate is pretty low.

N **newcozar78 PREMIUM** · Eki 28, 2021 [Cevap Gönder](#)

Is it a repaint? The label appears again as it blinks on A, B. On 1sec chart(replay mode) A: 2021-10-28 16:37:54 B : 2021.10.28 16:47:39

Which one has better results? Using close or high for calculations.. Did anyone test? I am testing original one with high

[Cevap Gönder](#)

J **jainmunish97 PRO** · Eki 20, 2021 [Cevap Gönder](#)

I'm trying to make this on chartink. I got the cross down. But struggling with the trend. can you please help? I want to filter condition where it shows buy only on chart and not sell

V **vasu72 PRO+** · Eki 16, 2021 [Cevap Gönder](#)

sir, this is great indicator, because after tried so many indicators I fixed to use this indicator. Its giving me confidence while trading. thank you very much for such a great indicator invented.

[Cevap Gönder](#)

P **pastet89** · May 28, 2021 [Cevap Gönder](#)

Love the idea of using close instead of high/low as extreme determination.

[Cevap Gönder](#)

A **aakashbikramrana PRO** · Mar 24, 2021 [Cevap Gönder](#)

This has been so useful. Thanks!

[Cevap Gönder](#)

K **Knuckles77 PREMIUM** · Kas 13, 2020 [Cevap Gönder](#)

sorry,wrong indicator

[Cevap Gönder](#)

R **randinito** · Haz 9, 2020 [Cevap Gönder](#)

Could anyone advise the newbie how to use this awesome indicator? For instance, why are Sell/Buy markers sometimes located way above/below the candles? And what are those lines that sometimes lead from those markers? Prolly a stupid question, but hey I'm totally new.

[Cevap Gönder](#)

vaggelis32 **PRO** · Haz 19, 2021 · iOS İçin TradingView [Cevap Gönder](#)

@randinito, is most likely like a resistance type of breaking the red line and when it does it start making a green line below the price,then when that green line(support type) is breaking it start a new red line forming
