

SuperTrend
everget WIZARD Mar 7, 2019

Mar 7, 2019 This is a redesign of the SuperTrend indicator. It removes stupid transitions between SuperTrend states and highlights initial points for both lines.

SuperTrend is a moving stop and reversal line based on the [volatility](#) (ATR).

Mar 10, 2019 **Sürüm Notları:**

- Modified initial algorithm

Abu 4, 2019 **Sürüm Notları:**

- Added Buy/Sell alerts
- Added Buy/Sell labels

Abu 4, 2019 **Sürüm Notları:**

- Fix erratum

Eski 10, 2019 **Sürüm Notları:**

- Converted to Pine V4
- Added an option to take candle wicks into account

From now on, checked "Take Wicks into Account" option the SuperTrend will respond more clearly than default one:

Eski 13, 2019 **Sürüm Notları:**

- Added long/short state highlighting

Kas 27, 2020 **Sürüm Notları:**

- Update

Şub 15, 2021 **Sürüm Notları:**

- Fixed bug with 4-price Doji candles

wengkol · Kas 2019

Hey Bro, I find this Indicator very useful but how this it works anyway? how can it detect on where to signal on when to buy or sell? I combined it along with another supertrend indicator with LONG and SHORT signal, What I did was if their label cross each other I confirmed it that, that's the right time so set my position. But I'm a little confused if how this indicator works!

+18 ▲ Cevap Gönder

everget WIZARD · Kas 18, 2019

@wengkol, Hi, this is ATR-based trailing stop, commonly used as a trend indicator

+12 ▲ Cevap Gönder

alikarimi64 · Nis 21, 2021

@wengkol, Hi May I know which indicator did you combine with supertrend?

+6 ▲ Cevap Gönder

How exactly should you work with this script, if you see it on this chart:

-4 ▲ Cevap Gönder

everget WIZARD · Eki 10, 2019

@ondrej.holubek, this tool works as an ATR-based trailing stop. Once you get Buy signal you enter the market for long. You keep your long position till the Sell signal.

▲ Cevap Gönder

yrxs6es2bm · Nis 17, 2020

@everget, I just started trading lost like most of my money so far you think If I use it I could start winning a bit of money thanks . ?

Thanks

▲ 4 ▲ Cevap Gönder

ArtWells · Eki 11, 2019

@ondrej.holubek, Trade something with less volatility. Find stocks to trade with a high R square value; you won't be in and out so many times.

▲ Cevap Gönder

everget WIZARD · Eki 13, 2019 cevap pm

@dgrom, could you ask your questions via DM or Telegram and provide the screenshots?

+1 ▲ Cevap Gönder

daytraderph · Eki 10, 2019 cevap pm

could tell me experience in live market ? does it change the signals ? calculations seems based on average so i believe t will change
+1 ▲ Cevap Gönder

everget WIZARD · Eki 10, 2019 cevap pm

@daytraderph, there are two modes - the first one is based on close prices, the second one - on high/low wicks. For wicks mode it will not change the signals, i.e doesn't add/remove label on realtime bar. For close prices mode it may change the signals on realtime bar - so you have to wait for bar closing.

+1 ▲ Cevap Gönder

Gopherzine PRO+_{PRO} · Eki 9, 2019 cevap pm

Looks promising, however when I try save the script or add to chart I get this message: Script could not be translated from: |B|longStop := close >

Hello sir, please can you tell me what settings of ATR Period and ATR multiplier would be the best for 1-minute or 5-minute timeframe if I'm going to trade some altcoins as OMG,TRX and other?

Hi Alex, Can you send the strategy for this indicator? What I need to do to try this one out.

Thanks again for your time.

Hi Everget. This looks amazing and exactly what I need, but is there a way to use this in ThinkOrSwim? I tried transferring the code over, but for some reason it keeps getting rejected. Have you helped anyone with this before? It would be a great help. Please let me know and thank you very much.

Hey thanks for taking the time to write and share this script with us! I'm just beginning, would you be able to share the strategy on the best way to set this up and use please? I mostly use 5/3/1 min charts.

Should I use with another indicator for best results?

thanks :)

I found.The real numbers are different. Test on the emulator. The strategy gives a huge drawdown, almost 40 percent on the 4-hour chart. 18-19 year.On the day can be used, but the strategy closes too late long.
