

This screenshot captures a highly detailed financial trading environment, likely from TradingView or a similar platform. The interface is filled with various windows and panels, each displaying different types of data and analysis.

- Top Left:** A main chart window for **Bitcoin / TetherUS - 1G BINANCE**. It features a candlestick chart with moving averages (HMA, JMA, Kijun, VAMA) and a bar chart for the **QQE MOD** indicator. The script for this chart is visible on the left side of the screen.
- Top Center:** A secondary chart window titled **SSL Hybrid**, showing a candlestick chart with multiple moving average overlays and a bar chart for the **QQE MOD** indicator.
- Right Side:** A large panel displays a list of **Izleme Listesi** (Watchlist) with symbols like DAX, BTCUSD, XRPUSD, ETHUSD, DOGEUSD, ADAUSD, and NEOUSDT. It also shows real-time price data and a log of recent trades.
- Bottom Right:** A detailed view of the **BTCUSD** market, including a candlestick chart, a bar chart for the **QQE MOD** indicator, and a table of historical data with columns for Son, Değ, Değ, and Değ.
- Bottom Left:** Another instance of the **SSL Hybrid** chart, identical to the one in the top center.
- Bottom Center:** A large text area containing the **SSL Hybrid** script, which is designed for the NNNX Method. It includes comments explaining the logic for Baseline entries, SSL2 continuations, and Exit trades.

The overall layout is very dense and technical, reflecting a professional setup for monitoring and trading multiple markets simultaneously.

rexitctrading - Ağu 25, 2021

@aqclimber; what settings are you using? I'm also trying to use it to scalp alt coins. Thanks

+13

aqclimber PRO - Ağu 25, 2021

@rexitctrading, I am using HMA baseline and some confluence rules. If you need some more details write me inbox

+4

G GrOF - Ağu 31, 2021

@aqclimber; I was looking at this chat :D .. I'm trying with these indicators to trade altcoins ADA/USD for example .. Is it okay 15min time frame , and what else I need to know? thanks!

+4

aqclimber PRO - Eylül 1, 2021

@GrOF, Hey man, ldk, but I'm using it on 1m TF for scalping, with HMA baseline and combined with QQE MOD, RSI Hist. and Schaff Trend. Also WestLeaf ADX for filter choppiness and support resistance

+1

G GrOF - Eylül 1, 2021

@aqclimber, I have tested on 30min and 45 TF, and those signal arrows are kinda better than on 1-5-15min, but yea everyone has a different strat..Thanks anyway!

+2

aqclimber PRO - Eylül 1, 2021

@GrOF, of course, the results depend on the filters you use, your trading style, asset and also a market fase, It's pretty individual. You're welcome

+1

G GDossous - Nis 16

I like to use as well 1M time TF. However I am not fully profitable yet. Can you give me any advice on some indicators to combine?

+1

B burnanmiri - Eki 4, 2021 - Android için TradingView

@aqclimber, hey man, I would like to get more clues to this ind. Using ur settings, thanks

+1

I iamsukeshh PRO - Eki 19, 2021

@aqclimber, Hey I am using this too as well on 1tf. Can you share some helpful points.

+2

aqclimber PRO - Eki 20, 2021

@iamsukeshh, It's my very personal style, but I use it on very low timeframes in conjunction with SuperTrend 33, 2.8 setting only entering in direction of SuperTrend. Also I use ADX 9 histogram as chop filter (threshold 25). Just take profit 1 candle, SL 1 candle too. Hope it helps.

+2

I iamsukeshh PRO - Eki 20, 2021

@aqclimber, Really appreciate the reply. This information would help a lot. Just wanted to know is there any SSL different settings you use or it's at default. Glad for your help.

+5

aqclimber PRO - Eki 20, 2021

@iamsukeshh, you're welcome! All default settings, just displaying the baseline, don't use SSL1 nor SSL2. I use it on 1m.

+1

R ranyharfouche01 - Oca 6

@aqclimber, Hello! Can you please put all the settings clearly in one comment, it is a bit confusing

+2

aqclimber PRO - Oca 7

@ranyharfouche01, Hello, what timeframe do you use, on what instrument?

+1

R ranyharfouche01 - Oca 7

@aqclimber, 5minutes timeframe and mainly BTCUSD.

+2

aqclimber PRO - Oca 7

@ranyharfouche01, I have a nice settings for stocks, futures and indexes for 2,3 and 5m, trying to figure out now for btc on 5m, but the market structure is more heterogeneous

+1

P pakshal21 - Nis 10

@aqclimber, I trade in stocks and indexes on 5 mins can you share me better settings for it?

+1

F Footage - May 4

@aqclimber, Hey man, I've been trying to scalp with this strategy on gold on the 5 min and 15 min timeframe. What settings would you recommend and how do I change them?

+1

carlito.crypto PRO - Ağu 28

@carlito.crypto, small question: which alert do you use to exit? the baseline buy/sell or this exit buy/sell?

+1

aqclimber PRO - Ağu 28

@carlito.crypto, I have fixed tp, I use exit buy/sell as entry trigger as well

+1

E erkolart - Kas 11, 2021

@aqclimber, Hi can you explain the settings ?

+1

M mikemiller2021 - Oca 26

@aqclimber, hello friend, when do you enter the trade when you have an arrow or dot? Cnt understand what those dots represent, Alarm set to tell buy/sell but it rings all the time so I am little bit confused. Thanks in advance for your time.

+1

aqclimber PRO - Oca 31

@mikemiller2021, Hello! I have special settings for specific timeframes and use only arrow in conjunction with some external filters and the price action. If you don't want the alarms to sound every second, select the 'Once per bar close' option, but you would need to enter fast on the open of the next candle.

+5

B Bill_J PRO - Kas 10, 2021

@Bill_J_Prosad, I tried that for the first time today. Worked like a charm. You may need to use intuition and other clues (wicks) to achieve the top results but it definitely will keep you in the green.

+1

J Jimmytizes PRO - Nis 8, 2020

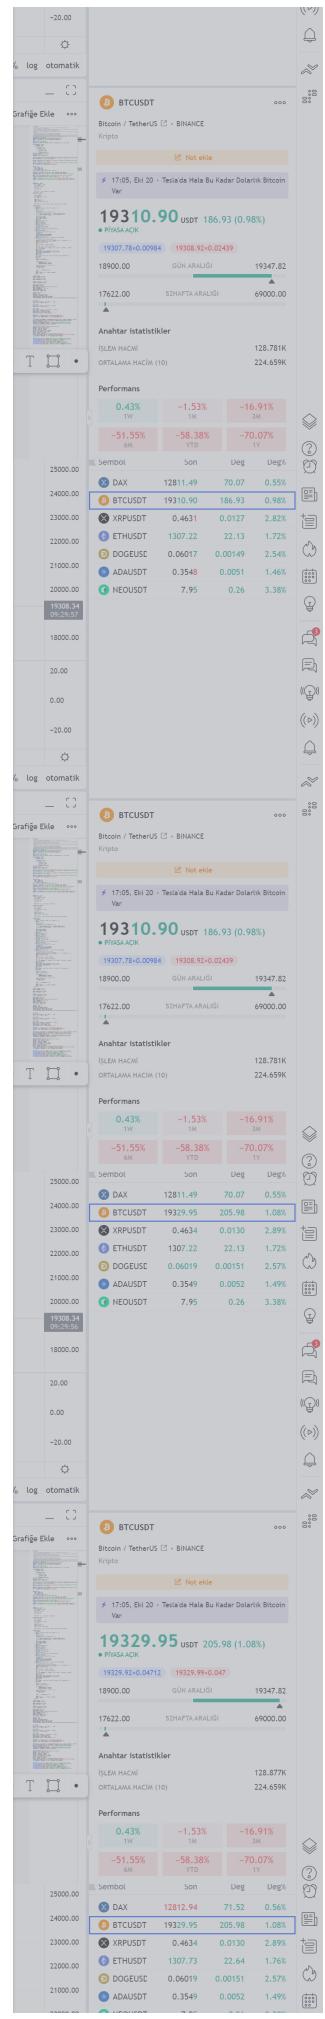

Fantastic indicator that saves me using multiple trading view indicators. As a cherry on top I have a few suggestions if possible!

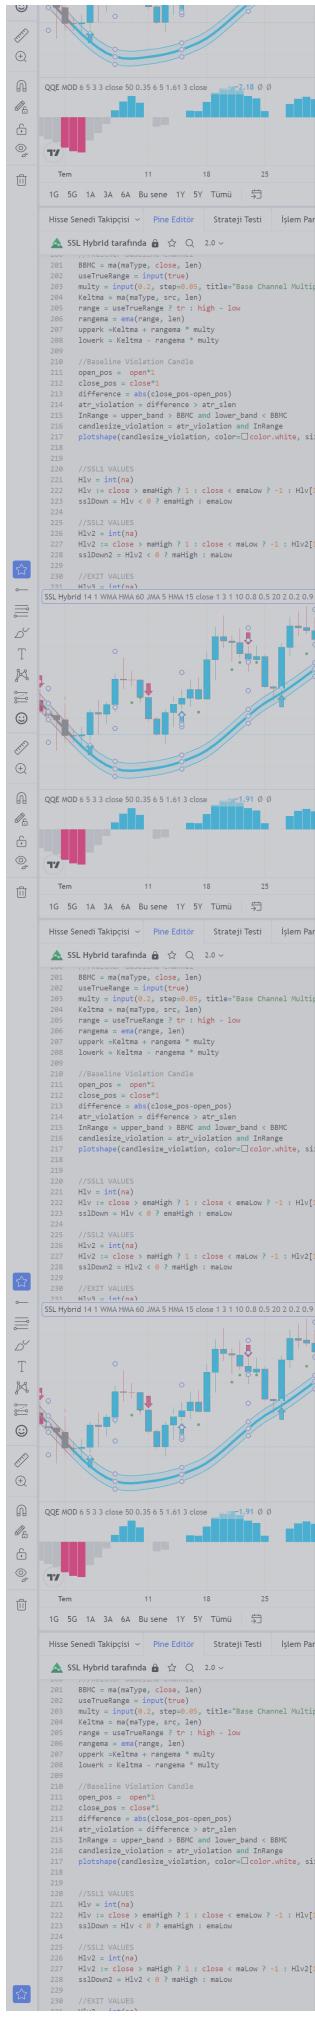

1. Add the WMA as baseline

2. Add the option to make the McClellan based on Hlc3 as well as candle close- this is because the McClellan based on close can get distorted on large volatile candles

3. Show when price is outside of 1x ATR from the baseline

4. Add ATR bands of x1.5 ATR

Thank you for sharing your great work :)

SAEEDSSL90 - Ağustos 8, 2020

tnx,mhkt amazing baseline and confirmation indi,but if you could explain how ssl2 works,that'd be great!

+▲ Cevap Gönder

itsnoelv PRO - Haz 26, 2021

for all the ones asking how it works, is it great, does it work on all time frames, assets.....?

Do 2 things:

1. Check NNFX videos - entire strategy is explained for free

2. Back test yourself -- do some effort

+6 ▲ Cevap Gönder

thephilipgregory - Mar 14

@itsnoelv, Just had to respond to this snarky comment: 1.) We shouldn't have to go research some video somewhere when there isn't even a link to it here, and the instructions and details should be clearly written out on this page, but they aren't. 2.) Sometimes, even if you have backtested it (I have and it seems fine on all timeframes) it is nice to confirm other findings via other people's experience. Just because it's worked for me 100 times doesn't mean it's worked that many times or in the same way for others, especially considering there are a billion settings that can affect the outcome. So, I suggest, unless you have something helpful to add to the conversation other than "go search for yourself and do some effort", maybe don't even comment? For everyone else, thanks for providing your experiences here so we can all benefit.

+▲ Cevap Gönder

mohammedalahmed7 PRO - Mar 29

@thephilipgregory, good words .lol

+▲ Cevap Gönder

itsnoelv PRO - Nis 7

@thephilipgregory, Yes we should help one and other and that's what I did. The entire post is written on the NNFX method, thus if people don't what that is, better to do some research first. Meaning: look up what the post is about and backtest it yourself. Then you can share it.

I'm basically addressing the people who want an easy fix and rather wait for other to do the work rather than doing a bit of research themselves.

+1▲ Cevap Gönder

Foutage - May 4

@itsnoelv, What videos should we watch? There's multiple playlists and I don't know which playlist to watch.

+▲ Cevap Gönder

dsnawac - Mar 5, 2021

I have a question about the arrows and what exactly they entail. They seem to be influenced by more than just the SSL crossovers. Do they combine some of VP's rules within? I have seen all of NNFX content, and I this indicator is super powerful. I just want to be sure I'm using correctly. I tried looking through the code to find my answer, but I am no programmer lol.

I have back tested it and appears that arrows are entries/exits, green and purple dots are entries and exits for continuations. But do those entries and exit signals contain signals ONLY, or do they employ the one candle rule as well?

Is there a volatility/volume function inside this indicator as well? I've noticed options to change the bar colors, but not sure what exactly they indicate.

Good work on this Indicator!

+6 ▲ Cevap Gönder

giemzju - Nis 29, 2021

@dsnawac, Im in the same boat as you, I've been using this indi for a min now and I believe when candles are red it signifies that there is a down trend, red with green borders is a bull candle but still has bearish momentum/trend, green is a bull, green w/ red borders is bear in bull momentum/trend. that being said I honestly have no clue what the grey is. I want to say that the green/red/grey have something to do with volume/volatility but the grey doesn't really match up with that conclusion, if you have insight id appreciate it. as for the arrows and dots im pretty sure they arent effected by the candle rule, def could be completely wrong about all this but that what ive gathered, theres alot to this indi and im really trying to figure it all out so anything anyone has to say is appreciated.

+6 ▲ Cevap Gönder

▲ Cevap Gönder

B behappyabroad PRO - Mar 16

This is a GREAT Indicator! After doing some testing, I can confirm that it works well on basically any time frame (though better on 10 min and above). The only complaint and pain I have is the alerts. With the current alert setup, there are definitely false positives with lots of them. It was impossible to turn on so many alerts without getting overwhelmed. I only open 10 trades.

Baseline buy alert works fine, it fires when the blue candle crosses the baseline (even if the green arrow appeared a couple of candles before that in the red zone, we don't want to enter on the down trend anyway). 'Exit buy' alert works fine, it seems to correspond to the red arrow. However, 'buy continuation' alert is running it. It doesn't correspond to any arrow and it seems to fire when the candle crosses the SSL3 line. So if I have all three alerts activated, sometimes I get one alert for the baseline buy entry, then many consequent alerts for 'buy continuation' (one per candle of the price happens to stay around the same level for a while and then only one exit alert for all multiple previous buys). This simply doesn't work with bots. And if I deactivate the 'buy continuation' alert, I'm missing on many entry points during the up trend. PLEASE, add two more types of alerts - one for green arrow and another one for red arrow. This will be a GAME CHANGER. I wouldn't even mind to pay for this because I'm 100% sure that setting up a bot with this alerts will be literally an automated money printing machine. Thanks again for this indicator, it's simply amazing!

▲ Cevap Gönder

S SanFutures - Mar 27

benedictmurray PREMIUM - Eki 14, 2021 ~

Hey I see that there are alerts for certain movements such as "baseline buy entry" etc. Can anyone point out to me how to set up alerts when an arrow to either buy or sell appears.

acephyo - Eki 5, 2021 ~

Is there exfile for mt4?

hamed787 PREMIUM - Oca 13, 2021 ~

Hi this is a great script thank you, but it does repaint!

UnknownUnicorn6721901 - Oca 3, 2021 ~

Is it possible to make this indicator in NinjaTrader 8?

TerenceDuivenvoorden - Ağu 1, 2020 ~

Very nice, beautiful and useful! Thank you

Tstrader6275 PRO - May 17, 2020 ~

Very nice. I started a chat with you. Not sure if you saw it. I've not done this before so not sure if I'm doing it correctly. I have a lot of questions and would like to know if there's some way to communicate directly. I'm happy to share my email or phone number with you. Let me know Thanks

levi_daniels PREMIUM - May 12, 2020 ~

Love it mate, good work!

tanvir0525 - Nis 11, 2020 ~

Could you do this for MT5?

Mihkel00 - Nis 17, 2020 ~

@tanvir0525, Unfortunately im not familiar with MQL 5

Jose5770 - Sub 6, 2020 ~

would you mind converting this into a strategy?? Only the ssl1/baseline but wouldn't mind if you added the exit also :)

zaxxbegge - Sub 5, 2020 ~

I copied the script and pasted but did not work can you help me how to download it?

SimonHunter - Sub 8, 2020 ~

@zaxxbegge, add the script on favorites by this page. Then go to your chart and click on indicators, if you don't see the favorites refresh your page. Now double click on it.

zaxxbegge - Sub 5, 2020 ~

How do you download it?

Carl20211111 - Oca 18, 2020 ~

Is it best to wait for the candle to turn blue before entry?

Mihkel00 - Oca 20, 2020 ~

@CarHORoute, Its best to wait for the candle close before entry.

dubie37 - Oca 11, 2020 ~

how do i add this to mt5?

Duyck - Oca 10, 2020 ~

Really good work!!

Fractured - Oca 9, 2020 ~

Nice Work!

Akshay28285 - Eki 15 ~

How to screen stocks using this indicator? TIA

afrozhann34 - Eyl 23 - Android için TradingView ~

Ok

zschnonn PREMIUM - Eyl 23 ~

@Mihkel00
I must appreciate your efforts, this is one of the best indicator I have found on TV. I although got this for 1D chart but later have tried until on 4h, 1h & 15m chart, works well. Many thanks!

MidWinter57 PRO - Eyl 21 ~

Honestly, I backtested this like 1000 times with EMA 200 + QQE + MACD. Aiming mostly for R:R = 2 on BTC 1min TF. It works well. Somedays you can achieve 12R, in the worse days i got -3R. The thing is that it's a full time strat. I have not tested it for like 2h a day, might be working awesell.

rezazaghami525252 - Eyl 16 - Android için TradingView ~

Hello friend, I am trying to setup Tradingview alerts. Which condition to choose for a Buy Entry that has the Blue and Red Arrows? Will it be Baseline Buy Entry and Baseline Sell Entry. Appreciate your help.

[Cevap](#) [Gönder](#)

thephilipgregory - Mar 14 [cevap](#)

Please confirm for all of us: are the arrows only EXITS, or are they ENTRIES AND EXITS, as in, arrow up = "buy here" and arrow down = "sell here"? The dots, we are all assuming are continuation trades (entering more units) but please, more explanation on the color coding and why?

[Cevap](#) [Gönder](#)

thephilipgregory - Mar 14 [cevap](#)

Why couldn't we use this on, for example, the 15 minute chart? Who trades daily charts? Is there any way to do intraday with this? Anyone have any experience with it? Recommended settings?

- HII you want the indicator! Could anyone tell me what does BUY or SELL CONTINUATION mean and how does it act as a signal? I am connecting indicators with trading view alerts. Thank you!
- P pinger2006 PREMIUM** · Kas 19, 2021
- Brilliant, thank you! Back tested on daily candle above the 200EMA using VWMA & ATR Bands @ 1.5 across many different tickers and it almost never loses! I would recommend back testing it on a ticker before using for real as the results definitely vary. When looking at smaller timeframes for scalping it seems a bit noisy so ensure you are following the price action too. Looking forward to using this over the coming months for real to see if it can improve my success rate. I'm extremely confident it will.
** I'm sure it would work in a down trend market below the 200EMA too but I haven't tested that.
- K khirsagarvi** · Mar 18
- @michael38372,
can you explain in detail on what rules you backtested it?
also while backtesting, have you applied trailing SL?

I couldn't understand ATR bands and VWMA setup that you told here?
please give some info if you are still using this and for How many trades till now?
my telegram id is raynor0111. Please guide me if you can give few minutes to tell about this indicator setup. I am trading since 2 years and still in loss.
Your help would be immensely appreciated.

bhavarshemang - Oca 19, 2020 cevap
 what is QQE MOD?
 Cevap Gönder

Mihkel00 - Oca 20, 2020 cevap
 @bhavarshemang , Its a Modification of original QQE (Qualitative Quantitative Estimation), in which I have put two QQEs together.
 The original is within zero cross parameters and the 'hidden' QQE is within bollinger band parameters. When the two agree with eachother, its going to plot a red or blue column.
 Im probably going to post it in a few hours when I get back home, since there has been some demand for it.
