

Haz 18, 2020 Hello Traders,

This is Support Resistance script that uses Multi Time Frame . While getting Close/Open/High/Low values of Higher Time Frames the script does NOT use Security function, instead it calculates them.

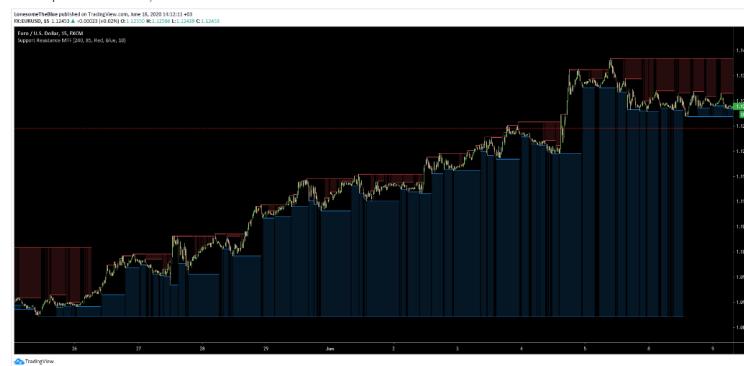

while choosing Higher Time Frame, you can use "Auto" option so it uses predefined Higher Time Frames, or you can choose the Higher Time Frame Manually from the list. options for HTF -> 15mins, 30mins, 60mins, 120mins, 180mins, 240mins, 720mins, Day, Week, 2 Weeks, Months, 3 Months, 6 Months, 12 Months.

You have option to use High/Low or Close/Open values while calculating support resistance levels.

"Period for Highest/Lowest Bars" option is used as loopback period to check if it's Highest/lowest bars. smaller numbers = more sensitive result.

You have option for transparency and coloring of support/resistance levels/zone -> Red, Lime, Blue, White, Black, Olive, Gray

An example for 15 min chart, 4hours selected as HTF

You can set transparency and colors as you wish:

Enjoy!

- Haz 20, 2020 Sürüm Notları: "Extend Lines" option added. (user request)
- Eyl 28, 2021 Sürüm Notları: color option changed/improved and unnecessary parts removed
transp usage in fill() function removed
- Eki 4, 2021 Sürüm Notları: updated

Another Home Run LTB -)

Tested it out real quick and it seems to be the best S/R script written to date. As a person who uses price action pretty heavily, this definitely finds the right levels. I recommend users make the length a little longer. Depending on your typical hold period. For me, a length 50 seemed to hit the levels that I am interested in.

@kurtsmock, Yes, thank you for suggestion ^^

+2 ▲ Cevap Gönder

JosephTran4 · Tem 8, 2020

@kurtsmock, Is that the "period" function that you are referring to? What does 50 mean if you input it in there? I'm not sure what "loopback period" means.

+3 ▲ Cevap Gönder

kurtsmock Premium · Tem 8, 2020

@JosephTran4, Yes, in the settings its "Period for Highest/Lowest Bars" It is how far back the script identifies the highest and lowest bars, which is on lines 36 & 37

+4 ▲ Cevap Gönder

mildDingo35184 · Ara 3, 2020

@kurtsmock, can you plz let us know which timeframe worked for you and best way to use. I'm lookin for intraday. I just started trading recently with very small quantity.

+7 ▲ Cevap Gönder

rkayasth PRO · Eki 1, 2021

@kurtsmock, Can you guide where to make it 50? I saw lines 36 & 37, so do I make both 50?

If you can be precise, it will help a larger grp....

Thanks

▲ Cevap Gönder

@kurtsmock, are you a intraday trader? swing trader long term?

▲ Cevap Gönder

kurtsmock Premium · Kas 27, 2021

@framingham508, Intraday trader for the most part. Bitcoin would be an exception where I swing trade more

▲ Cevap Gönder

framingham508 PRO+ · Kas 27, 2021

@kurtsmock, awesome! I intraday also so

I will consider modifying to your settings,,, I like to play the 3 mins timeframe so I'm assuming use 15m as higher TF? Any assistance would be greatly appreciated

▲ Cevap Gönder

kurtsmock Premium · Kas 27, 2021

@framingham508, I like using 3x or 5x the timeframe I'm trading on for HTF indicators. But if using higher timeframe tools, you have to also consider your hold period. My personal rule of thumb is your hold period is going to be at least 3 bars if the trade goes your direction (all input tools considered). So, if I'm using a HTF indicator at 3x the trading timeframe (e.g. 10m htif when trading 3m chart) Then you'd generally be counting on a hold period of a minimum 30m. If your hold period is under 30m, then you have to consider if there's any value in using a htif indicator as an

Input to your strategy.

example summary: Looking for entries on a 3m chart with the intent to hold for a minimum 30 minutes + looking for supporting evidence of a good entry from a htf indicator using the 10m-15m timeframe. (good system). Looking for entries on a 3m chart for a 5 bar trade (15m) + looking for supportive evidence of a good entry from a htf indicator using the 10m-15m timeframe. (questionable imo). The important thing when choosing to use and how to use a htf indicator in a system is to consider your intended hold period for successful trades.

Hope that helps :)

@kurtisnock, awesome thank you so much for the breakdown and prompt response, had to read it a few times to get it as i am new to it all,

You've also brought clarity from another angle, ive never thought of how long to hold in terms on "Bars/Time" which is probably why many winners have turned to losers. Holding too long

Hello How to set the alarm when a new high low point is formed?

+2 ▲ Cevap Gönder

R **rmbinarysignals** · Agu 10, 2020

Hi Bro,
I'm looking for a simple code to identify bars in lower TF related to upper one, i.e. In TF 5min candles start and end is 2:00 - 2:05 and there are 5 candles between 2:00 to 2:04 I want to specify them and use it for a strategy for trading.
Suppose we name them as below:
Candle A (2:00)
Candle B (2:01)
Candle C (2:02)
Candle D (2:03)
Candle E (2:04)

if open > close then ...
+2

A **AngelaLandsberry** · Tem 10, 2020

Hey Lonesome, nice work man. This is going to be embarrassing but I am just terrible at deciphering how to use indicators that I found. Like in a practical sense. Like when does the shaded area appear? How do you use it in your trading? Thanks so much, I am sure it will be obvious once u point me in the right direction haha
+2

L **LonesomeTheBlue** · Tem 10, 2020

@AngelaLandsberry, where there is shaded area, there is S/R on current time frame and higher time frame. closer S/R is S/R for current time frame. If there is only 1 S/R line without area, it means current time frame OR higher time frame has S/R, or they have S/R at the same level. Is there is area and if price breaks closer S/R line then I know there is another S/R line and price may go there (as target). etc ;)
+4

A **AngelaLandsberry** · Tem 10, 2020

@LonesomeTheBlue, what do you mean by "closer S/R"? And when you say a higher time frame do you mean longer? Like if looking at a daily, a weekly would be higher? sorry to bother!
+4

L **LonesomeTheBlue** · Tem 10, 2020

@AngelaLandsberry, if the chart is 1D then HTF is week. closer means if there is an area it means there are two S/R lines, 1 comes from current time frame other comes from HTF. how HTF calculated is below:
timeframe.period == '1' ? '15'
timeframe.period == '3' ? '15'
timeframe.period == '5' ? '60'
timeframe.period == '15' ? '60'
timeframe.period == '30' ? '120'
timeframe.period == '45' ? '120'
timeframe.period == '60' ? '240'
timeframe.period == '120' ? '1'
timeframe.period == '180' ? '1'
timeframe.period == '240' ? '1'
timeframe.period == '1' ? 'W'
timeframe.period == 'W' ? 'W'
+3

V **volkancetin** · Tem 5, 2020

Thank you so much Lonesome. You have done a very successful work.
+2

P **Pro_fx_trading_lover** · Haz 23, 2020

how can I get it as an indicator? please help me someone.
+2

L **LonesomeTheBlue** · Haz 24, 2020

@Pro_fx_trading_lover, click "Add to Favorite Scripts" in this page, after you opened the chart search "Support Resistance MTF" in public library
+1

A **ajmerv** · Agu 22, 2020

Hi, Do you have alerts for this? Like whenever the candle and the support or resistance line is met.
+1

I **isalirezag** · Agu 20, 2020

thanks for sharing!
What is the difference between this and "Support Resistance - Dynamic"?

+1

L **LonesomeTheBlue** · Agu 20, 2020

@isalirezag, very different ideas behind them. in this script, it find S/R level by using current and higher time frames. in S/R dynamic script, it creates channels by using pivot points and check if it's really S/R level with enough strength. you can use one of them after checking which one is better for you.
+1

I **isalirezag** · Agu 20, 2020

@LonesomeTheBlue, Thanks for clarification
+4

L **LeLyonnais** · Eki 9, 2020

@LonesomeTheBlue, both sets are top :)

How to ideally use it? In hindsight it seems to let price move more likely into the direction that doesn't have filled background areas.
Any best practice on using it?
+1 ▲ Cevap Gönder
- L** **LonesomeTheBlue WIZARD** · Haz 24, 2020
@Canundo, if you see an area then start and end of the area is S/R. If you see a line only then current and htf S/R is at same level and if broken then price may go to side where it broke the S/R line.

Brilliant work sir. This is the best indicator on TV.
But will it be possible to get alert for a particular time frame when Support or resistance appears?
///can som1 please turn this script into an app, please///

Thank you, my dear friend, every time your wonderful work gets better and better, God grant you and your family health, thank you again for the wonderful script . I have a question for you, you can create a scenario based on cluster volume or analysis, I think it will be a masterpiece in your performance .

great indicator , still trying to find the best settings for the 1hr chart and if just keeping it in auto is the best bet or no

It is looking pretty good. I wonder how the bot would perform when breaking one of the levels would be a condition.

Hello.. thanks for the good work . I am a little finding it hard to understand how this applies. "Period for Highest/Lowest Bars" option is used as lookback period to check if it's highest/lowest bars. smaller numbers = more sensitive result" I have tried different values just to understand the variation but still I am unable to understand the significance. would you be kind enough to provide more details on usefulness .
