

This screenshot captures a complex financial trading environment, likely from TradingView or a similar platform. The interface is filled with various windows and panels, each displaying different types of data and analysis.

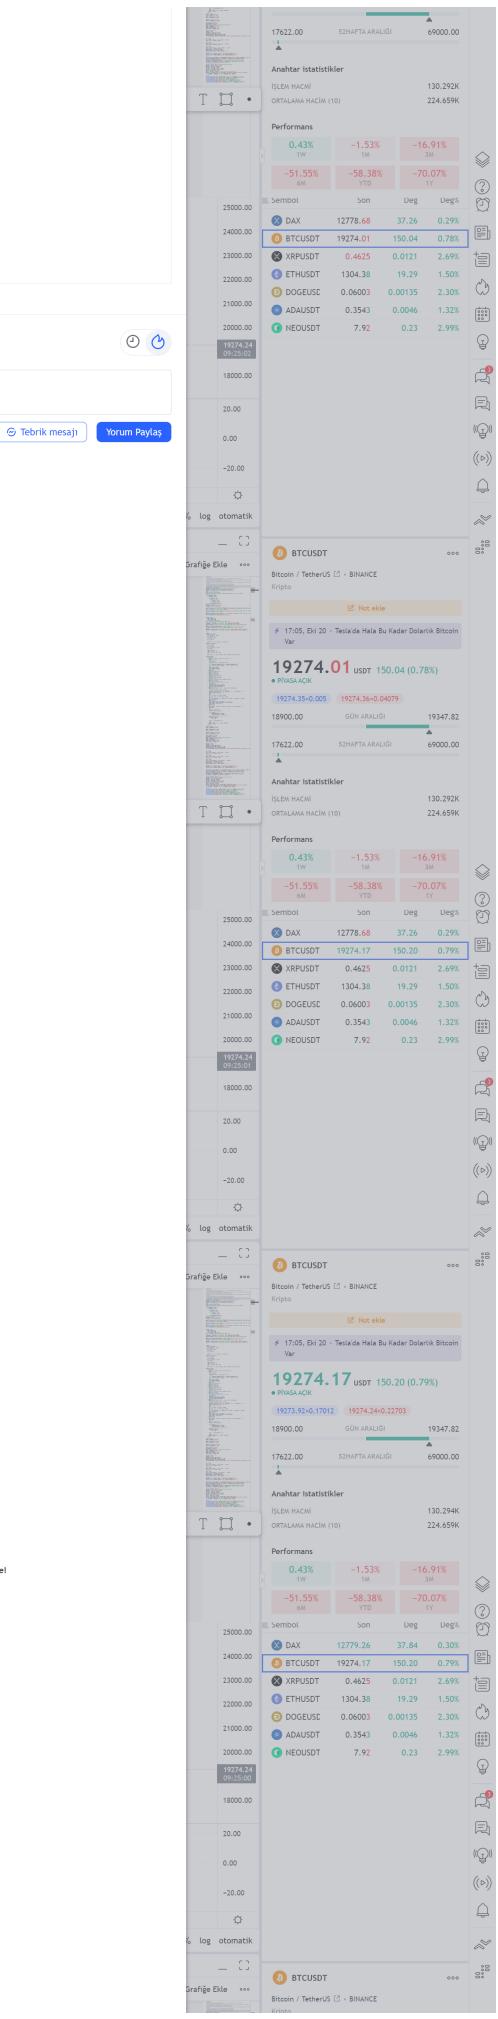

- Top Left:** A chart for BTCUSDT on a 1G timeframe, showing candlesticks, moving averages (5, 10, 20), and a Bollinger Band. A red candlestick is highlighted.
- Top Center:** A chart for Ingiliz Sterlini / İsviçre Frankı 1G FXCM, showing a price range from 1.22000 to 1.35000.
- Top Right:** A large panel for Binance BTC showing real-time market data for DAX, XRPUSDT, ETHUSDT, DOGEUSDT, ADAUSDT, and NEOUSDT.
- Middle Left:** A detailed view of the QQE MOD script, which includes:
  - A chart showing the QQE MOD indicator with values ranging from -40.0000 to 15.97395.
  - The original script code by Glaz.
  - A modified version of the script.
  - Two additional charts for BTCUSDT and ETHUSDT.
- Middle Right:** A log window titled "log otomatik" containing numerous entries related to the script's execution and optimization.
- Bottom Left:** Another instance of the QQE MOD script with its own set of charts and code.
- Bottom Right:** A final log window showing the results of the optimization process.

The overall layout is highly cluttered, reflecting a deep dive into technical analysis and algorithmic trading development.

The figure consists of three vertically stacked screenshots of a trading platform interface, likely MetaTrader 4 or a similar application, showing real-time price data for the BTCUSDT pair on the Binance exchange.

**Screenshot 1 (Top):**

- Symbol:** BTCUSDT
- Exchange:** Bitcoin / TetherUS (B) - BINANCE
- Status:** NOT ELİGE
- Price:** 19273.65 USD (149.68, 0.78%)
- Timeframe:** 1H (1H), 1M (1M), 3M (3M)
- Key Data:** 19272.71-0.0057, 19274.29-0.22703
- Volume:** 189000 (GÜN ARALIĞI), 176220 (52HAFTA ARALIĞI)
- Open Interest:** 19347.82, 69000.00

**Screenshot 2 (Middle):**

- Symbol:** BTCUSDT
- Exchange:** Bitcoin / TetherUS (B) - BINANCE
- Status:** NOT ELİGE
- Price:** 19273.65 USD (149.68, 0.78%)
- Timeframe:** 1H (1H), 1M (1M), 3M (3M)
- Key Data:** 19272.71-0.0057, 19274.29-0.22703
- Volume:** 189000 (GÜN ARALIĞI), 176220 (52HAFTA ARALIĞI)
- Open Interest:** 19347.82, 69000.00

**Screenshot 3 (Bottom):**

- Symbol:** BTCUSDT
- Exchange:** Bitcoin / TetherUS (B) - BINANCE
- Status:** NOT ELİGE
- Price:** 19274.25 USD (150.28, 0.79%)
- Timeframe:** 1H (1H), 1M (1M), 3M (3M)
- Key Data:** 19272.71-0.0057, 19274.29-0.22703
- Volume:** 189000 (GÜN ARALIĞI), 176220 (52HAFTA ARALIĞI)
- Open Interest:** 19347.82, 69000.00

Hi @Mihkel00 ,could you explain how 'read' the silver bars?what does they mean?  
▲ Cevap Gonder
- D** djerving - Nis 26  
@H\_ALEXANDRU\_DROM From my little experience so far, the grey bars indicate consolidation. Orange and light green indicate there are more buyers, or sellers starting to come in, and that the trend may reverse at the close of the candle. Red and darker green indicate a strong trend in that particular direction. This is what I believe I understand of it. My opinion only from watching closely. Please do not just take my word for it. I have just begun using this ind, but it is serving my purposes quite well, which is getting into the trade and avoiding consolidation periods.  
▲ Cevap Gonder
- W** wixy24 PRO - May 6  
@djerving\_I don't see these colours. I have pink and blue bars? What settings are you using please and what timeframes are you using this on?
